

Aitor Mugarza is ICREA Research Professor and Group Leader of the Atomic Manipulation and Spectroscopy Group at ICN2 since 2013. He has previously been Marie Curie Fellow at the Lawrence Berkeley National Laboratory, USA, and Ramon y Cajal Fellow at ICN2. He is author of 75+ articles, and of 60+ invited talks at international conferences, universities and schools. He is founder and coordinator of the SPM Platform that is being created at ALBA synchrotron. His research activity is based on the investigation of quantum properties of matter on the nanoscale, and developing strategies to manipulate them with atomic precision.
